“We primarily use Flash to display your publications, and 'extracting' meaning from that to use for reading devices etc. is not as easy as we could wish for. We'll keep exploring the options here, though.

However, if you want to make everyone happy, you should simply use PDF download as a supplement to Issuu (or Issuu as a supplement to your PDF downloads) on your website. This way you're not ruling anyone out with your choice of technology, but offer multiple formats with different uses.”
